

If you suffer or you know anyone who suffers from any of the conditions listed on the front page of this brochure, we suggest that you participate in a complimentary in home sleep screening to determine if there is an obstruction or restriction issue that may be contributing to your condition.

We Are Happy To Provide The In Home Sleep Screening At No Cost To You. The Screening Will Be Able To Identify Whether A Restriction May Be An Issue. If A Restriction Is Present, You Will Now Know And You And Your Doctor Can Then Better Determine An Appropriate Course Of Treatment.

We are also excited about the opportunity to serve you as the provider of the DAG Appliance Treatment Program in the South King County area. We have over 35 years of experience in serving the people of Federal Way area and we are pleased to offer this state-of-the-art therapy. Our objective is to offer treatment that is insurance based as well as exceptionally effective and convenient to the patient. The DAG Appliance Treatment Program satisfies all of these criteria and more.

We Encourage You To Speak With Dr. Farley And To Your Medical Doctor To Learn More About Appliance Therapy.

Please call 253-838-2018 to schedule your complimentary in home sleep screening. The knowledge you gain may be the first step toward a course of treatment that ultimately results in the successful treatment of your condition.

As always, we are here to serve you.

Dr. F. Mike Farley

Better Breathing Means Better Health

If You Suffer, Or If You Know Anyone Who Suffers, From Any Of The Following Conditions:

Sleep Apnea
Other Sleep Disorders
Headaches (all forms of)
Tension Headaches
Stress Headaches
Migraines
Lack of Energy
Interrupted Sleep Patterns
Obesity Issues
Anxiety
Hypertension
Tiredness
Snoring
Soreness in the Ears
Clenching of the Jaw
TMJ Problems
Range of Motion
Trigger Point Pain
Insomnia
Fatigue

Please Ask Dr. Farley About Receiving ***A Complimentary In Home Sleep Screening.*** The Screening Can Determine If Your Breathing Is Restricted While You Sleep Which, In Many Cases, May Be A Cause And/Or A Contributing Factor To Your Condition.

A Restriction Issue (Sleep Apnea) Is Often Dangerous And Should Be Corrected

- A list of conditions that can be caused and/or intensified because of some type of restriction is set forth on the cover of this brochure.
- A restriction issue may cause an increase in anxiety or depression.
- A loss of interest in sex and poor performance at work or school may be caused by a restriction issue.
- A restriction issue may result in an increase in daytime sleepiness which increases the risk of motor vehicle accidents from driving while sleepy and increases industrial accidents that result from falling asleep on the job.
- A person who suffers a restriction issue will often times act grumpy, impatient or irritable.
- A person who suffers from a restriction issue may be forgetful and may fall asleep while reading, working, or watching TV.
- A restriction issue may cause hard to treat headaches.
- If untreated, a restriction issue may lead to or worsen heart disease including heart arrhythmias, heart failure, high blood pressure and/or stroke.

The good news is that the DAG Appliance Treatment Program now offered by Dr. Farley is extremely effective at treating restriction issues (sleep apnea). Once the airway is opened (through the appliance), a significant number of conditions are alleviated.

The in home sleep screening is convenient, painless and accurate. Neither you nor your insurance company will be charged for the service. The screening will be able to accurately determine if you have a restriction issue (some degree of sleep apnea). The results will allow you and your Doctor to better determine the best course of treatment for you.

- The in home sleep screening offers state of the art technology that accurately monitors airflow and respiratory effort while at the same time offering comfort and convenience. ***You actually are able to sleep!!***
- The in home sleep screening provides sleep laboratory level of results while allowing you to sleep in your own bed. The equipment is compact so there is no bulky equipment involved.
- The in home sleep screening is easy to set up and the equipment has been designed to maximize comfort during your sleep.
- A patient guide is provided which provides detailed information on the set up process including labeled illustrations and pictures.
- An on line video tutorial is also available to guide you through the setup and the execution of the screening.
- The in home sleep screening device provides limited interference with the patients sleeping habits. If the patient wants to get up in the middle of the night, move around, or snuggle with their bed partner, there will be no trouble doing that. This allows the Doctor to be able to obtain data that is a true reflection of the patient's normal sleep.

The At Home Screening Provides Maximum Comfort With A Sleep Laboratory Level Of Results *While Allowing You To Sleep In Your Own Bed.*
